'As digital technologies rapidly transform the practice of humanities research, new arenas of theoretical inquiry engaged with this revolution are also emerging. Together these advances are coming to be known as the 'e-humanities', and in this field Australian humanities scholars are world leaders.'

– Australian e-Humanities Gateway (c.2002)

About us

The Centre for Literary and Linguistic Computing (CLLC) was established to continue the development and application of statistical and computing tools for the analysis of (literary) texts.

Centre for Literary and Linguistic Computing is based in the School of Humanities and Social Scienceein the Faculty of Education and Arts, University of Newcastle, some of the centre highlights are;

- Prof. Craig awarded Discovery Grant for 'Folio Shakespeare texts and their Quarto and Octavo antecedents', 2016
- Hosted the Wollombi Seminar for leading international thinkers in Computational Stylistics, 2015
- Emeritus Professor John Burrows presented the Wisbey Lecture in King's College, University of London in September 2006
- In 2004 the group hosted an international conference on humanities computing
- Emeritus Professor John Burrows travelled to New York in June 2001 to receive the 2001 *Busa Award*
- A Practicable Future for Computing in the Humanities: An International

TIMEMAP: TIME-BASED INTERACTIVE MAPPING

Update 2008: *TimeMap is Open Source and available from SourceForge*

Update 2016: *TimeMap, while dated, is still supported. However we recommend using Heurist, which provides linked mapping and timelines as one component of a much more comprehensive data management package*

TimeMap is:

- A Methodology
- A Community
- Software
- *Web*
- *Kiosks*
- *CD-ROM*
- *Map animation*
- *Online digitising*
- *Database delivery*

Digital Harlem

View

Site Overview

An award-winning component of the Black Metropolis: Harlem collaborative research project, whose goal is to "produce an ethnographic study of everyday life in Harlem as it became the black capital of the world."

The Digital Harlem website presents information, drawn from legal records, newspapers and other archival and published sources, about everyday life in New York City's Harlem neighbourhood (primarily arrests and related court records) in the years 1915–1930 (Black Metropolis' ARC project). The database is being extended with a specific study of the events of 1935 ('Year of the Riot' ARC project).

Winner of the American Historical Association's 2010 Roy Rosenzweig Prize for Innovation in Digital History, and the American Library Association's 2010 ABC-CLIO Online History Award.

DESIGN & ART AUSTRALIA ONLINE

database and e-research tool for art and design researchers

Data Out | Data In | Search | Advanced search

What the database does

Design & Art Australia Online's community is diverse and each sector of the community uses the site for different reasons. Our aim is to provide a flexible system that can respond to those varied needs. Here's an overview of what this site does:

- Brings together biographical data about Australian artists, designers, craftspeople and curators with information about artworks, event histories and collection details from major cultural institutions and individual researchers.

- Works with data provided by Australia's leading research and collections institutions to generate information about art and design works, exhibitions and awards.

- Disseminates content nationally and internationally, providing new cohorts of researchers with access to authoritative data on Australia's cultural heritage.

- Exposes previously unavailable datasets to each other, enabling new questions about Australian art and design to be conceived.

Midja Integrated Knowledge Base

Defining the Impact of Regionalism on Aboriginal Housing and Settlements

This ARC Discovery Indigenous Project aims to improve our understanding of the regional factors that impact on Indigenous Housing by establishing a comprehensive knowledge-base that enables region-specific needs analysis.

By integrating qualitative and quantitative data, and comparing case studies from remote, rural and urban regions, this project will identify the most significant factors in different contexts and tailor solutions to optimize Indigenous housing outcomes. Expected outcomes include improved housing management, housing design, health and well-being of Indigenous communities and a reduction in crowding and homelessness.

HuNI Data Model

31 data sources: covering history, literature, cinema, media, biography, linguistics, performing arts and visual arts

Technical considerations: response speeds, ease of use for constructing queries, etc

Users' research needs: what research questions are users trying to investigate? E.g., "how is Gallipoli represented in literature, art and film?"
